## Additional Info

### Specialty

Featuring Samsung industry-leading 1800R screen, the CJG5 curves around your field of view to immerse you in all the onscreen gaming action. The rapid 144 Hz screen refresh rate minimises image lag and motion blur for smoother gaming. The user-friendly 60 Hz/120 Hz settings let you quickly optimise performance via the on-screen display without having to access the display setting menu. With approximately 1.7 times more pixels than Full HD, WQHD resolution displays game scenes and characters in captivating detail. And with a wider view than equivalent-sized lower resolution monitors, WQHD lets you spot your enemies before they see you. The CJG5 Game Mode instantly optimises black gamma levels, contrast ratios, sharpness and colour value settings for any game genre or movie.
